ArgoNeuT Simulation Needs

T. Yang
6/13/14

- ArgoNeuT continuous to analyze data.

- We appreciate all the help on simulation issues from SCD in the past.

- We would like to be able to generate MC samples using different generators (e.g. NuWro, Nuance)

  - LArSoft can take particle list in text file format and do Geant simulation. Need better documentation and it is not clear how to count POT.
